

The "Do-Not-Call" list is the ONLY sanctuary that residents have against corporations who will do ANYTHING to earn a buck. As it is, the list does not completely protect land-line phone users (there are companies that still call after the daily deadline and many do not even respect the list by stating that they did not know that the phone number was on the list).

If you overturn this law, it will create more havoc and frustrations than already exist.

Thank you.
